

Title: Accelerating Progress in Maternal and Newborn Health - Collaboration with Canada

Donor: Canada

Recipient Country: Sexual & Reproductive Health Branch

Duration: 29-Mar-2011 - 31-Mar-2016

UNFPA reference (fund code): UZJ10

Contributions: Fifty million Canadian dollars (CAD 50,000,000)

Contact address: rmb@unfpa.org

Overview:

This proposal presents the first country level collaboration among the H4+ in support of the UN Secretariat General Global Strategy for Women's and Children's Health (the Global Strategy). Through providing support to five countries, the H4+ will facilitate the achievement of the country commitments to the Global Strategy and in the process, accelerate progress towards maternal and newborn health-related MDGs.

The goal of the programme is to assist countries in accelerating the implementation of the commitments already made to the Global Strategy in order to demonstrate progress towards MDGs 4 and 5, as well as to the women and children's health aspect of MDG 6 in selected countries.
