

Continued **commitment** for
transformative results

As a leading core donor, Finland empowers UNFPA to achieve transformative results: ending preventable maternal deaths, meeting the unmet need for family planning, and ending gender-based violence and harmful practices. At the onset of a crisis, women and girls face immense challenges. Core and other flexible funds also enable UNFPA to respond swiftly to evolving needs, support gender-based violence expertise in crisis-affected areas, uphold global accountability standards, and ensure access to essential health services.

In **Tanzania**, Finland and UNFPA are effectively responding to gender-based violence and harmful practices, providing critical support to all women and girls, including those with disabilities, by ensuring survivors have access to a full range of services—medical care, psychosocial support, legal guidance, and referral pathway. This creates a safe space where their rights are protected and respected.

UNFPA and Finland

A partnership for women and girls

Thanks to UNFPA's strong partnership with Finland, more women and girls around the world are enjoying healthier, more fulfilled lives, free from violence.

See how Finland is making
a difference.

About UNFPA

UNFPA, the United Nations Population Fund, is the sexual and reproductive health agency of the UN. It works to uphold the rights and choices of women, girls and young people across more than 150 countries. UNFPA aims to ensure that every pregnancy is wanted, every childbirth is safe, and every young person can fulfil their potential. It also helps governments plan for changing demographics, to build inclusive and resilient societies.

All UNFPA funding is voluntary – we rely on governments and other partners to support our programmes.

Our partnership

A long-term **partner** with a lasting impact

Finland has been a leading donor to UNFPA for many years. The prioritization of flexible core funding means UNFPA is able to plan strategically and uphold its global normative mandate as a champion of sexual and reproductive health and rights.

These flexible resources enable UNFPA to deliver long-lasting results that promote, protect and fulfil human rights, while leaving no one behind. UNFPA collaborates with the private sector to mobilize resources and leverage knowledge, technology and innovation to improve the lives of women and girls globally.

Driving women's health innovations

Finland is helping close global gaps in women's health and in sexual and reproductive health research and development through advocacy and positioning of technology and innovation. Core resources help UNFPA pursue promising innovations, mobilize domestic resources for development, bridge funding gaps and seed programmes that deliver lasting results.

Results for resources in 2025

800

Maternal deaths averted

896,800

Women and young people reached with integrated sexual and reproductive health services

364,900

Unintended pregnancies prevented

110,700

Sexually transmitted infections prevented by provision of female and male condoms

111,800

Unsafe abortions prevented

1,579,200

Individuals and their partners provided with a full year of contraceptive protection

249,500

Marginalized girls reached by life skills programmes

300

Women and girls living with obstetric fistula received treatment

2,500

HIV infections prevented by providing female and male condoms

5,600

Girls saved from female genital mutilation

Key results are illustrative only and reflect a calculation based on the donor's total contribution proportionally to UNFPA's overall results. While a selection of results are included, the support from our partners enables UNFPA to uphold the rights and choices of women, girls and young people across more than 150 countries, meet immediate needs, pursue promising innovations, bridge funding gaps and seed broader investments.
