

An ally in health for all

Flexible core funding allows UNFPA to plan strategically and uphold its global normative mandate as a champion of sexual and reproductive health and rights, a priority for Germany. The partnership between UNFPA and Germany focuses on addressing the needs of young people, delivering life-saving humanitarian assistance and procuring contraceptives through UNFPA Supplies Partnership, our flagship programme on family planning. Furthermore, UNFPA promotes public-private partnerships for the advancement of global health, with private sector actors like Bayer. This partnership focuses on improving women's health, expanding access to modern contraception, and strengthening reproductive health services in low- and middle-income countries.

UNFPA and Germany

About UNFPA

UNFPA, the United Nations Population Fund, is the sexual and reproductive health agency of the UN. It works to uphold the rights and choices of women, girls and young people across more than 150 countries. UNFPA aims to ensure that every pregnancy is wanted, every childbirth is safe, and every young person can fulfil their potential. It also helps governments plan for changing demographics, to build inclusive and resilient societies.

All UNFPA funding is voluntary – we rely on governments and other partners to support our programmes.

Read more about Germany and UNFPA engagement on UNFPA's website:

A partnership for women and girls

Thanks to Germany's strong partnership with UNFPA, more women and girls around the world are enjoying healthier, more fulfilled lives, free from violence.

See how Germany is making a difference.

Our partnership

A **champion** for maternal death and ending female genital mutilation

Every woman and newborn is entitled to quality health care. Through its support for UNFPA, Germany helps countries with high maternal mortality strengthen health systems and train midwives. With partners like Germany, UNFPA is working towards a world where no mother or newborn dies during pregnancy, childbirth or after delivery due to preventable causes. Germany has been an indispensable partner in programmes aimed at ending child marriage and harmful practices, such as female genital mutilation, so girls can continue their education and realize their full potential.

A **partner** for innovation

Through investment in innovation, Germany enables UNFPA to leverage its global footprint and expertise through collaborative and inclusive partnerships with national and international stakeholders, academia, private sector and communities, to close women's health gaps with solutions such as advanced products or process innovations.

Germany is also hosting the WomenX Collective Global Hub, an innovative UNFPA programme aiming to transform the health of every woman and girl.

Results for resources in 2025

1,400

Maternal deaths averted

610,800

Unintended pregnancies prevented

187,200

Unsafe abortions prevented

1,501,300

Women and young people reached with integrated sexual and reproductive health services

185,300

Sexually transmitted infections prevented by provision of female and male condoms

2,643,700

Individuals and their partners provided with a full year of contraceptive protection

500

Women and girls living with obstetric fistula received treatment

9,300

Girls saved from female genital mutilation

417,600

Marginalized girls reached by life skills programmes

4,200

HIV infections prevented by providing female and male condoms

Key results are illustrative only and reflect a calculation based on the donor's total contribution proportionally to UNFPA's overall results. While a selection of results are included, the support from our partners enables UNFPA to uphold the rights and choices of women, girls and young people across more than 150 countries, meet immediate needs, pursue promising innovations, bridge funding gaps and seed broader investments.
