

# INVESTING IN FAMILY PLANNING IS A BEST BUY

If women and young people can access contraceptives, they can **finish school and join the workforce.**

Every \$1 invested in family planning can **save governments up to \$6.**

When women and young people can plan their families and futures, **entire communities and nations thrive.**

**Yet there is still a significant unmet need for family planning.**

**214 MILLION** women who want to avoid pregnancy are not using modern contraceptives.

This translates to over **88 MILLION** unintended pregnancies annually in developing countries.

**UNFPA Supplies is the best bet to ensure that everyone, everywhere can access the contraceptives they want and need.**

UNFPA Supplies provides about

**40 PER CENT**

of the world's donated contraceptives, reaching over

**20 MILLION**

people every year.

However, the programme faces a **funding gap of nearly US\$ 700 million** from 2017 to 2020.\*

Without these funds, UNFPA Supplies cannot provide contraceptives to the world's poorest and most vulnerable.

\*As of 1 January 2017

**Millions of people depend on UNFPA Supplies and are counting on these funds to protect their futures.**

# NO PRODUCTS, NO PROGRESS.

**When we fill the UNFPA Supplies funding gap, the benefits will be enormous. We will:**

**Avert 116 million  
unintended  
pregnancies**

**Avoid 2.2 million  
maternal and  
child deaths**

**Prevent  
45 million  
abortions**

**Save \$5.5 billion  
in health-care  
costs for families  
and nations**

**And if we don't, the effects will be devastating.**

**Invest in UNFPA Supplies now.  
Secure a more prosperous future for all.**
