

UNFPA

Reducing Environmental Impact

GREEN PROCUREMENT

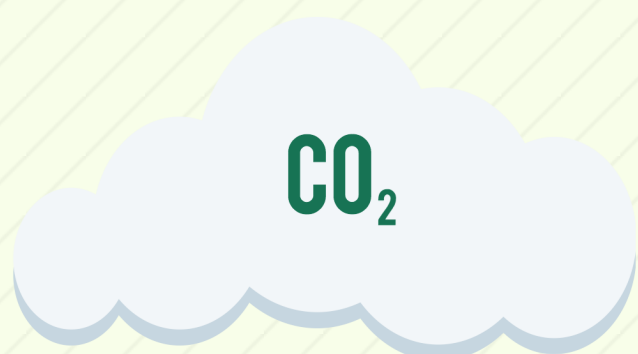

EST. 2013

Since UNFPA launched its Green Procurement Strategy in 2013, one of the first objectives was to collaborate with our suppliers to reduce the environmental impact of the UNFPA supply chain.

Resource depletion has been one of the pillars of this collaboration.

Two years later, UNFPA suppliers have proven that going green is both possible and beneficial

7.793 metric Tons saved per month

Reduction of **11.8M** Kg of solid waste per month.

11,301,554kwh electricity saved per month

PER MONTH

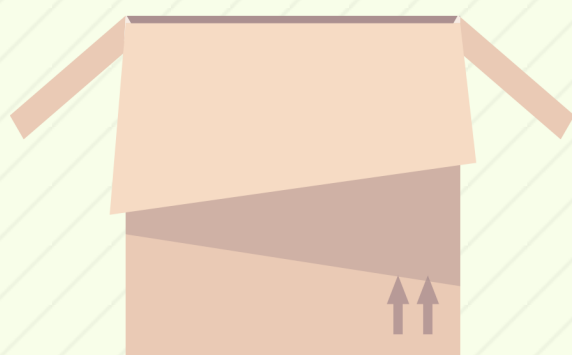

587,598 m3 Water saved

995,397 m3 Water treated

200,415 Kg

FSC certified cardboard and outer boxes purchased

*FSC certified or equivalent

Recycled/post consumer materials

55.6%

in outer boxes and shipping materials.
